Description

Advanced paperless recorders suitable for any application with a sophisticated feature set and touch screen. Compared with the first generation VR series, the PR series offers so much more, for example recorders in 4.3" & 12.1" displays in addition to 5.6", 100 msec sampling rate, external channels, batching, custom displays, more strict FDA 21 CFR part 11, handwriting messages, SD Card slot, 2 USBs, pulse input, field calibration, onboard Web Server, email, 19 languages, IP65, and yet all of this in shorter a depth of only 167mm.
